

[Security classes and insured amounts]

Only a certified safe can optimally protect your valuables from burglary and provide you with the opportunity to insure them properly. Rigorous testing methods and precisely defined specifications guarantee the best quality. The construction according to DIN 4102 provides additional light fire protection.

Fig. Test method with cutting torch (above) and with diamond core drill (right)

The labels on the inside of safe doors contain important information regarding:

- the product
 - the European norm
 - the resistance grade, quality grade / lock grade
 - the serial number
- (identification of the producer and prevention of misuse)

[Security classes – burglary protection]

[VdS ECB-S VSÖ CNPP (a2p)]			Insured amounts	
VdS ECB-S	VSÖ-VVO	CNPP (a2p)	Domestic up to	Commercial up to
Grad I / D-I	Class EN 1	Class I E	EUR 65.000	EUR 20.000
Grad II	Class EN 2	Class II E	EUR 100.000	EUR 50.000
Grad III	Class EN 3	Class III E	EUR 200.000	EUR 100.000
Grad IV	Class EN 4		EUR 400.000	EUR 150.000
Grad IVKB	Class EN 5		EUR by arrangement	EUR 250.000
Grad V	Class EN 5		EUR by arrangement	EUR 250.000
Grad VKB	Class EN 6		EUR by arrangement	EUR 375.000

The quoted – recommended but not binding – sums apply to Germany and Austria. The insurance amount may double when safe is connected to an alarm system. Please note, not all type series are certified by CNPP. You can find more information on the respective type pages.

[Quality classes – fire protection]

[Fire protection]	Label	Description
EN15659 – LFS30 *	ECB-S	30 min. fire protection for paper
EN15659 – LFS60 *	ECB-S	60 min. fire protection for paper

* tested at IBMB Braunschweig
During fire protection tests the temperature increase within the safes is controlled, and according to the result the products are classified into different grades. Safes according to VdS provide protection from fire. Only fire tested safes guarantee certified fire protection. The sums insured are based on burglary protection.

[VdS – VdS Schadenverhütung GmbH – www.vds.de]

All Wertheim safes were tested against mechanical and thermal burglary devices by the independent testing institute, VdS Schadenverhütung GmbH based in Cologne, Germany. All Wertheim products passed the high testing standards of the CEN Norm EN1143-1 and were certified to the appropriate resistance levels. Wertheim safes can therefore be used and insured in all European countries.

[ECB-S – European Certification Board · Security System – www.ecb-s.com]

The ECB-S label confirms the adherence of Wertheim products to European standards. ECB-S certification is determined by testing in accordance with the European Norm EN1143-1 for products protecting valuables against burglary.

[VSÖ – Verband der Sicherheitsunternehmen Österreichs – www.vsoe.at]

All Wertheim safes are examined and certified by VSÖ. All valuables in a Wertheim safe in Austria can be insured according to the VSÖ guidelines.

[CNPP – Centre national de prévention et de protection – www.cnpp.com]

Wertheim safes with a2p label have been certified by the French certification institute CNPP. CNPP is acknowledged by the French insurance industry and therefore all safes with a2p label are insurable in France.
