

Thank you for your inquiry/order.

When purchasing a safe, it is important to clarify the transport route and the situation in which it is to be brought in.

For smooth transport processing, we ask you to fill out this transport questionnaire carefully.

We thank you for your understanding that only after receipt of the completed transport questionnaire can a decision be made as to whether a standard delivery is possible or whether an on-site inspection or special transport with a price on request is necessary due to stair transport and/or special circumstances.

Our team of consultants will be happy to answer any questions you may have.

[Anchoring]

Safes weighing less than 1,000 kg must be anchored to a fixed part of the building in accordance with EN 1143-1. Wertheim equips all tested safes with floor anchoring. Strongrooms of resistance grades I to III (except CWS, CWP) also have the anchoring alternative through the rear wall. If further holes are required in addition to the prepared base/rear wall holes, these can be taken into account after the position (side wall, rear wall, ceiling, base) has been specified. Safes weighing less than 1,000 kg are supplied with 1 pc. Anchoring material is supplied. If additional anchors are required, this must be specified when ordering. To ensure proper anchoring, there must be no cables (pipes, wiring, etc.) in the anchoring area. When anchoring to the floor, make sure that it is preferably mounted on a load-bearing concrete base - anchoring only in the screed is not sufficient. When anchoring in the wall, the safe must be flush with the wall. Skirting boards, box walls (for installation in furniture), etc. must be removed in the area of the safe in advance by the customer. The client assumes responsibility for this and must confirm this upon delivery by signing the disclaimer. A declaration of conformity regarding proper anchoring (enclosed with the delivery documents) will be completed by the shipping team or sent with the invoice and must be submitted to the insurer for the full amount of cover. Please note that wall mounting (self-supporting) is not provided as standard. If manufacturer-compliant anchoring cannot be carried out due to structural conditions, the insurer may reduce the security class rating. We recommend that you clarify this with your insurance company in advance.

[Delivery]

The delivery and installation of your safe is included as follows: Freight paid insurance, installation at destination incl. installation (2-man installation crew), easily accessible, incl. 1 hour working time. Additional working time, wasted/additional journeys or storage costs incurred will be charged according to actual additional expenditure. Fixed deadlines (hourly windows) can only be agreed in the course of the delivery notification for an additional charge. The client shall be responsible for ensuring the required structural stability and the load-bearing capacity of the floor structure in the area of the transportation route and installation site. For safes weighing less than 1,000 kg, including anchoring in accordance with regulations. The delivery dates stated are approximate and in no way binding. Delivery shall be made by the forwarding agent after prior appointment by telephone (approx. one week before delivery). Deliveries are made Monday to Friday. Fixed day dates (Mon-Fri) are free of charge and can be fixed when ordering. Additional services, unsuccessful/cancelled deliveries, canceled appointments, additional journeys and storage costs incurred through the fault of or on the instruction of the customer shall be borne by the customer and will be charged. Additional equipment (crane, forklift, etc.) and/or additional personnel for difficult installation situations can be booked. This may require a prior site inspection by the forwarding agent and will be charged separately. The return of old appliances and their professional disposal will be charged at cost. If a delivery with smaller vehicles is necessary, this can only be realized with a special trip. The costs incurred for this are surcharges and must be requested separately.

I have read, understood and accept the above information and confirm that my details are correct and complete.

Execution is subject to the General Terms of Delivery of Wertheim Vertriebs GmbH.
